# **TOOWOOMBA AND SURROUNDS** HOSPITAL PUBLIC OUTPATIENT

**CTCA** (see back of form for criteria)

Ultrasound Liver

□ Mammography

□ EOS imaging

Ultrasound (specify region & clinical details below)

## Queensland X-Ray is offering **REDUCED WAIT TIMES** for public patients. Images sent back into selected PACS and report faxed to department.

Patient Details	Date:	DOB:						
	Name:	PATIEN	PATIENT LABEL					
	Address:		Phone:					
Diagnostic Request								
Mc	odality							
MRI (specify region below & tick clinical indication on back of form)			Bone Densitometry (tick clinical i of form)					
🗆 Plain X-Ray			🗆 Nuclear Medicine					
CT Scan			Procedures					

- ndication on back □ Procedures Biopsies Spinal injections (tick option, specify level and side below)

  - \_Side \_ □ Facet joint inj: Level\_ Side
  - □ Nerve root inj Level \_
  - □ Epidural steroid inj Level \_
  - Guided injections (specify region and clinical detail below)

## Region to be investigated / Reason for referral and clinical history

REFERRER: Fax <u>both sides of</u>
<u>referral</u> to 1300-023-191. We will
contact patient to make booking.
Queensland X-Ray will go through any
questionnaires and preparation with
your patient prior to the study.

## OR

**PATIENT:** To make a booking email both sides of referral to Toowoomba@qldxray.com.au OR call 1300-770-151 OR visit www.qldxray.com.au

#### Tick for IMAGE TRANSFER:

Toowoomba Base

Other (please specify).

## Additional Patient Information

Diabetic

Sarcoma

Prostate

Gastrointestinal

Bone or Soft Tissue Sarcoma - Staging (61640)

Oesophageal/GOJ - Staging (61577)
 Gastroenteropancreatic NET - Diagnosis -DOTA Peptide PET (61647)

PSMA Intermediate to high-risk, staging (61563)

Sarcoma - Restaging (61646)

Colorectal - Restaging (61541)

PSMA Restaging (61564)

Rare or uncommon Cancer Initial Staging (61612) □ Following initial therapy (61614)

- Melanoma
- Known renal Impairment Previous contrast reaction
- Public Hospital Outpatient

#### PET/CT Medicare rebateable studies are below. Please tick which items apply.

Metastatic SCC unknown primary - Staging (61610)

PET Breast - Stage III, Staging (61524)
 PET Breast - Restaging (61525)

Cynaecology Ovarian - Restaging (61565) Uterine Cervix - Staging (61571) Uterine Cervix - Restaging (61575)

- □ PET with Whole Body Diagnostic CT (Head, Chest, Abdo, Pelvis)
- 🗆 Plus Extremity (eg. Melanoma, Sarcoma, Myeloma, PUO, Vasculitis/Arteritis, Rheumatoogical or where limb involvement suspected)

Head & Neck

Breast

Melanoma

Staging (61598)

Restaging (61604)

Restaging (61553)

- □ PET with localised diagnostic CT (please tick region/s)
- □ Head □ Neck □ Chest □ Abdo □ Pelvis □ Extremity
- PET with Non-Diagnostic CT (attenuation correction) No CT report issued
- □ Primary/Suspected site

#### Histopathology

#### Lung

□ Solitary Pulmomary Nodule - Diagnosis (61523) □ NSCLC - Staging (61529)

#### Brain

- Brain Restaging (61538)
- Epilepsy Evaluation (61559)
  Alzheimer's Diagnosis (61560)

## Lymphoma

- Staging (61620)
- Staging (61620)
  First Line Surveillance during treatment (61622) Second Line Surveillance (61632)
- □ Restaging after recurrence (61628)

## Request form / Referral

## For specialised studies please tick the relevant clinical indications box below.

### Liver / Pancreas / Crohn's MRI

- MRI Liver Confirmed extra-hepatic primary malignancy (other than HCC) & CT liver is negative/inconclusive of metastatic disease & identification of liver metastases would change treatment planning (63545)
- MRI Liver Known / suspected hepatocellular carcinoma & chronic liver disease & liver function Child-Pugh
- class A/B; & Hepatic lesion >10mm **(63546)**
- □ MRI Enterography to evaluate small bowel Crohn's disease (63740)
- MRI Enteroclysis for Crohn's disease using the placement of NG tube (63741)
- □ MRI Pancreas/biliary tree (MRCP) for suspected biliary or pancreatic pathology (63482)
- **MRI** for fistulating perianal Crohn's disease FOR evaluation of pelvic sepsis and fistulas (63743)

## **Pelvis MRI**

- $\hfill\square$  MRI Pelvis for the investigation of
  - a) sub fertility that requires one or more of the following:
    - i. an investigation of suspected Mullerian duct anomaly seen in pelvic ultrasound or HSG
    - ii. an assessment of uterine mass identified on pelvic ultrasound before consideration of surgery
    - iii. an investigation of recurrent implantation failure in IVF; or
  - b) surgical planning of a patient with known or suspected deep endometriosis involving the bowel, bladder or ureter where the results of pelvic ultrasound are inconclusive (63563)
- □ MRI Pelvis for staging of histologically diagnosed cervical cancer at FIGO stages 1B or greater (63470)
- □ MRI Pelvis & Upper Abdomen for staging of histologically diagnosed cervical cancer at FIGO stages 1B or greater (63473)

## □ MRI Pelvis for initial staging of rectal cancer (63476)

#### Breast MRI

- MRI of both breasts where the patient has a breast lesion, AND the results of conventional imaging examinations are inconclusive for the presence of breast cancer, AND biopsy has not been possible. (63531)
- RRI of both breasts where the patient has been diagnosed with breast cancer, AND discrepancy exists between clinical assessment and conventional imaging assessment, AND the results of breast MRI may alter treatment planning (63533)
- □ MRI of both breasts for the detection of cancer (63464)
  - Where the patient is asymptomatic younger than 60 years of age and is either at high risk of developing breast cancer, due to one or more of the following: i. genetic testing has identified the presence of a high risk breast cancer gene mutation in the patient or in a first degree relative of the patient; ii. both:
  - ii. both:
    - A. 1 or more 1st or 2nd degree relatives was diagnosed with breast cancer at age 45 years or younger; AND
  - B. Another 1st or 2nd degree relative on the same side of the patient's family diagnosed with bone or soft tissue sarcoma at age 45 years or younger iii. had onset of breast cancer before the age of 50 years
  - iv. has a personal history of mantle radiation therapy
  - v. has a lifetime risk estimation greater than 30% or a 10 year absolute risk estimation greater than 5% using a clinically relevant risk evaluation algorithm.

#### Prostate MRI for diagnosis (63541)

- □ a) DRE suspicious for prostate cancer; or
- b) Less than 70 years, at least two prostate specific antigen (PSA) tests performed within an interval of 1-3 months are greater than 3.0 ng/ml, and the free/total PSA ratio is less than 25% or the repeat PSA exceeds 5.5 ng/ml; or
- c) Less than 70 years, whose risk of developing prostate cancer based on family history is at least double the average risk, at least two PSA tests performed within an interval of 1-3 months are greater than 2.0 ng/ml, and the free/total PSA ration is less than 25%; or
- d) 70 years or older, at least two PSA tests performed within an interval of 1-3 months are greater than 5.5 ng/ml and the free/total PSA ratio is less than 25%.

## Prostate MRI for surveillance (63543)

Patient has not had a diagnostic mp/MRI and is placed on active surveillance following a confirmed diagnosis of prostate cancer by biopsy histopathology; and is not planning or undergoing treatment for prostate cancer.

### CT Coronary Angiogram (57360)

- Patient has stable or acute symptoms consistent with coronary ischemia is at low to intermediate risk of an acute coronary event.
- CT Coronary Angiogram (57364)
- At least one of the following apply to the patient:
  - i. Patient has stable symptoms and newly recognised LV systolic dysfunction of unknown aetiology
    - ii. Requires exclusion of a coronary anomaly or fistula
  - iii. Undergoing non coronary cardiac surgery
  - iv. Requires assessment of the patency of coronary bypass grafts

#### **Myocardial Perfusion Study** a) The patient has sympto

- a) The patient has symptoms of cardiac ischemia; and
- □ b) At least one of the following applies
  - i. the patient has body habitus or other physical conditions (including heart rhythm disturbance) to the extent that a stress echocardiography would not provide adequate information
  - ii. the patient is unable to exercise to the extent required for a stress echocardiography to provide adequate information
  - iii. the patient has had a failed stress echocardiography
- For more information please see: https://www.qldxray.com.au/referrers/resources/medicare-information

## Bone Densitometry (tick indication below)

## □ 12 mths+ since prior BMD. 12 mths since significant change in therapy **(12321)**

- First BMD, age 70+ □ 5 years since prior BMD, age 70 years+ with no to mild osteopenia (T-score 0 to -1.5) on prior BMD (12320) 12 mths+ since prior BMD Female hypogonadism > 6mths before age 45 □ Male hypogonadism (please also tick description) □ Prolonged glucorticoid therapy (as per MBS) Conditions associated with excess alucocorticoid secretion (12312) 24 mths+ since prior BMD □ 1 or more fractures after minimal trauma Scans 2 years+ with T score -1.50 or lower, or a T score -2.50 or lower (please also tick description) □ Monitoring osteoporosis proven by prior BMD (12306) Primary hyperparathyroidism 24 mths+ since prior BMD Proven malabsorptive disorders (Crohns, Coeliac) (please also tick description) Conditions associated with thyroxine excess □ Rheumatoid arthritis □ Chronic liver / renal disease (12315)
- 24 mths+ since prior BMD. Age 70+ and has moderate to marked osteopenia (T–score -1.5 to -2.5) on prior scan. (12322)

# Queensland X-Ray stores your images for FIVE years. Visit us for all your medical imaging and create a complete and highly secure five-year electronic radiology record which your doctor can access 24/7.

Queensland X-Ray Pty Ltd and Queensland X-Ray Hospital Partnership No 23 trading as Queensland X-Ray (a registered business name of Queensland X-Ray Pty Ltd ABN 40 094 502 208). 7983 01/25

Your doctor has recommended you use Queensland X-Ray. You may choose another provider but please discuss this with your doctor first

PATIENT LABEL

**REFERRER:** Fax <u>both sides of</u> <u>referral</u> to 1300-023-191. We will contact patient to make booking. Queensland X-Ray will go through any questionnaires and preparation with your patient prior to the study.
